

# THE MANIFEST

What if we turn the ecology in an olympic discipline.

In Olympus dwell mythics characters, source of amazing tales. All the key fields in our current society are subject of it : agriculture, craftsmanship, business, medecine, hobbies... Now, it belongs to us to integrate the sustainability and to build up new stories of legend up to the issues of our century !

In echo to the original essence of the olympic games, we launch an exceptional edition Ma Petite Planète to gather around common values : the sharing, the solidarity, the cooperation, the inclusiveness and the love ( of sport, of nature, of the living).

What could be said about these games ? Ma Petite Planète is aware of the event's incoherence regarding the planet limits. Transports, waste, buildings, or also energy expenses : it's actually a ecologic red card.

In front of this observation, different forms of commitment exist, everyone takes part of it according his/her own identity and values. At Ma Petite Planète, we chose to enter the field and pursue our goal of make the biggest number aware. We see in these games an unique opportunity to involve a maximum of persons in the transition including citizens who did not have the flame for ecology.

Like sport, ecology is a team matter : let's federate around ecologic and sport challenges, with team represented by sport inspiring figures. We are counting on you for thousand tries and above all nice conversions.

Join our fanzone, we welcome everybody : optimistics and sceptics, beginners and advanced in ecology, sportive.s ( casual) and those who are not feeling in tune with the Games, or can not participate.

Ecology is the outsider of these games, it belongs to us to create the surprise and get on the podium :  
prepare yourself for the Games of ecology.

The team MPP.
